

CLAIM AMENDMENTS

The following is a detailed listing of all claims that are, or were, in the application. A status identifier is provided for every claim and the current text of every claim is presented, unless the claim has been cancelled or withdrawn. Current amendments to the claims are expressed in the detailed listing by strikethrough (for deleted matter) or underlining (for added matter).

1. (Currently Amended) A method comprising:
arranging for a customer to redeem a product from a third party;
receiving, via a communication network, information relating to a redemption, of the product and by the customer, that has occurred; and
determining to accept an offer based on the received information.
2. (Original) A method according to Claim 1, wherein the offer is received from the customer.
3. (Original) A method according to Claim 1, wherein the offer is received from a second customer.
4. (Original) A method according to Claim 1, further comprising
determining, based on the received information, a third party at which an offer product may be redeemed according to the accepted offer.
5. (Original) A method according to Claim 1, wherein the information comprises a retail price of the product during the redemption.

6. (Original) A method according to Claim 5, wherein the determining step comprises:

calculating a difference between an offer price included in the offer and the retail price; and

accepting the offer if the difference is less than a threshold amount.

7. (Original) A method according to Claim 1, wherein the information comprises an amount of the product redeemed at the redemption.

8. (Original) A method according to Claim 1, wherein the information comprises a time of the redemption.

9. (Original) A method according to Claim 1, wherein the information identifies the third party.

10. (Original) A method according to Claim 1, wherein the information comprises information concerning other products purchased during the redemption.

11. (Original) A method according to Claim 1, wherein the offer is an offer to purchase the product.

12. (Currently Amended) A method comprising:

arranging for a customer to redeem a product from a third party;

receiving, via a communication network, information relating to a redemption, of the product and by the customer, that has occurred; and

determining an offer based on the received information.

13. (Original) A method according to Claim 12, further comprising presenting the offer to the customer.
14. (Original) A method according to Claim 12, further comprising presenting the offer to a second customer.
15. (Original) A method according to Claim 12, wherein the information comprises a retail price of the product during the redemption.
16. (Original) A method according to Claim 12, wherein the information comprises an amount of the product redeemed at the redemption.
17. (Original) A method according to Claim 12, wherein the information comprises a time of the redemption.
18. (Original) A method according to Claim 12, wherein the information identifies the third party.
19. (Original) A method according to Claim 12, wherein the information comprises information concerning other products purchased during the redemption.
20. (Original) A method according to Claim 12, wherein the offer is an offer to sell the product.

21. (Currently Amended) A method comprising:
arranging for a customer to redeem a product from a third party;
receiving, via a communication network, information relating to a
redemption, of the product and by the customer, that has occurred; and
determining, based on the received information, an assigned third
party at which an agreement product may be redeemed.
22. (Original) A method according to Claim 21, further comprising receiving
an offer to purchase the agreement product.
23. (Original) A method according to Claim 22, wherein the offer is received
from the customer.
24. (Original) A method according to Claim 23, wherein the agreement
product and the product are a same product.
25. (Original) A method according to Claim 22, wherein the offer is received
from a second customer.
26. (Original) A method according to Claim 25, wherein the agreement
product and the product are a same product.
27. (Original) A method according to Claim 21, wherein the information
comprises a retail price of the product during the redemption.
28. (Original) A method according to Claim 21, wherein the information
comprises an amount of the product redeemed at the redemption.

29. (Original) A method according to Claim 21, wherein the information comprises a time of the redemption.
30. (Original) A method according to Claim 21, wherein the information identifies the third party.
31. (Original) A method according to Claim 21, wherein the information comprises information concerning other products purchased during the redemption.
32. (Original) A method according to Claim 21, wherein the determining step comprises comparing a present market share associated with the third party to a target market share associated with the third party.
33. (Currently Amended) A method for a sales transaction, comprising:
receiving a redemption identifier from a customer;
providing a product to the customer according to an agreement associated with the redemption identifier;
transmitting, via a communication network, information relating to the providing step to an entity, the information indicating that the product has been provided to the customer; and
receiving authorization from the entity to provide a product according to a second agreement, the authorization based on the transmitted information.

34. (Currently Amended) A method for redeeming a product, comprising:
receiving a redemption identifier;
presenting the redemption identifier to a product retailer;
redeeming a product from the product retailer based on the redemption identifier; and
transmitting, via a communication network, redemption information to a third party for use in determining to accept a received offer, the redemption information relating to a redemption of the product that has occurred.
35. (Currently Amended) A method for a sales transaction, comprising:
arranging for a customer to redeem a product from a retailer;
receiving, via a communication network, information relating to a redemption, of the product and by the customer, that has occurred;
receiving an offer to purchase an offer product from a second customer;
determining to accept the offer based on the received information;
determining an assigned retailer at which the offer product may be redeemed based on the received information; and
transmitting an acceptance of the offer and an indication of the assigned retailer to the second customer.
36. (Original) A method according to Claim 35, wherein the step of determining an assigned retailer comprises comparing a present market share associated with a conforming retailer to a target market share associated with the conforming retailer.

37. (Currently Amended) A system comprising:

a controller comprising:

a controller memory storing processor-executable controller process steps;

and

a controller processor;

wherein the controller processor is operative with the controller process steps to: i) transmit a redemption identifier to a customer for use in redeeming a product at a retailer; ii) receive information relating to a redemption, of the product and by the customer, that has occurred; iii) receive an offer to purchase an offer product from a second customer; iv) determine to accept the offer based on the received information; v) determine an assigned retailer at which the offer product may be redeemed based on the received information; and vi) transmit an acceptance of the offer, an indication of the assigned retailer, and a second redemption identifier to the second customer;

a retailer device comprising:

a retailer device memory storing processor-executable retailer device process steps; and

a retailer device processor;

wherein the retailer device processor is operative with the retailer device process steps to: i) receive the redemption identifier from the customer; ii) determine whether to provide a redemption based on the redemption identifier; and iii) authorize redemption of the product by the customer; and

a customer device comprising:

a customer device memory storing processor-executable customer device process steps; and

a customer device processor;

wherein the customer device processor is operative with the customer device process steps to: i) submit the offer to purchase the offer product; and ii) receive the acceptance of the offer, the indication of the assigned retailer, and the second redemption identifier.

38. (Currently Amended) Processor-executable process steps embodied in a computer-readable medium, the process steps comprising:

an arranging step to arrange for a customer to redeem a product from a third party;

a receiving step to receive information relating to a redemption, of the product and by the customer, that has occurred; and

a determining step to determine whether to accept an offer based on the received information.

39. (Original) Processor-executable process steps according to Claim 38, wherein the offer is received from a second customer.

40. (Original) Processor-executable process steps according to Claim 38, further comprising a determining step to determine, based on the received information, a third party at which an offer product may be redeemed according to the accepted offer.

41. (Original) Processor-executable process steps according to Claim 38, wherein the information comprises a retail price of the product during the redemption.

42. (Original) Processor-executable process steps according to Claim 41, wherein the determining step comprises:

a calculating step to calculate a difference between an offer price included in the offer and the retail price; and

an accepting step to accept the offer if the difference is less than a threshold amount.

43. (Currently Amended) Processor-executable process steps embodied in a computer-readable medium, the process steps comprising:

an arranging step to arrange for a customer to redeem a product from a third party;

a receiving step to receive information relating to a redemption, of the product and by the customer, that has occurred; and

a determining step to determine an offer based on the received information.

44. (Original) Processor-executable process steps according to Claim 43, further comprising a presenting step to present the offer to a second customer.

45. (Currently Amended) Processor-executable process steps embodied on a computer-readable medium, the process steps comprising:

an arranging step to arrange for a customer to redeem a product from a third party;

a receiving step to receive information relating to a redemption, of the product and by the customer, that has occurred; and

a determining step to determine, based on the received information, an assigned third party at which an agreement product may be redeemed.

46. (Original) Processor-executable process steps according to Claim 45, wherein the determining step comprises a comparing step to compare a present market share associated with the third party to a target market share associated with the third party.

47. (Currently Amended) Processor-executable process steps stored on a computer-readable medium, the process steps comprising:

a receiving step to receive a redemption identifier from a customer;

a providing step to provide a product to the customer according to an agreement associated with the redemption identifier;

a transmitting step to transmit information relating to the providing step to an entity, the information indicating that the product has been provided to the customer; and

a receiving step to receive authorization from the entity to provide a product according to a second agreement, the authorization based on the transmitted information.

48. (Currently Amended) Processor-executable process steps stored on a computer-readable medium, the process steps comprising:

a receiving step to receive a redemption identifier;

a presenting step to present the redemption identifier to a product retailer;

a redeeming step to redeem a product from the product retailer based on the redemption identifier; and

a transmitting step to transmit redemption information to a third party for use in determining to accept a received offer, the redemption information relating to the redemption of the product that has occurred.

49. (Currently Amended) Processor-executable process steps stored on a computer-readable medium, the process steps comprising:

an arranging step to arrange for a customer to redeem a product from a retailer;

a receiving step to receive information relating to a redemption of the product and by the customer, that has occurred;

a receiving step to receive an offer to purchase an offer product from a second customer;

a determining step to determine to accept the offer based on the received information;

a determining step to determine an assigned retailer at which the offer product may be redeemed based on the received information; and

a transmitting step to transmit an acceptance of the offer and an indication of the assigned retailer to the second customer.

50. (Original) Processor-executable process steps according to Claim 49, wherein the step of determining an assigned retailer comprises a comparing step to compare a present market share associated with a conforming retailer to a target market share associated with the conforming retailer.

51. (Currently Amended) An apparatus comprising:
means for preparing for a customer to redeem a product from a third party;
means for obtaining information relating to a redemption₁ of the product and by the customer, that has occurred; and
means for deciding to accept an offer based on the obtained information.
52. (Original) An apparatus according to Claim 51, wherein the offer is received from a second customer.
53. (Original) An apparatus according to Claim 51, further comprising means for identifying, based on the obtained information, a third party at which an offer product may be redeemed according to the accepted offer.
54. (Original) An apparatus according to Claim 51, wherein the information comprises a retail price of the product during the redemption.
55. (Original) An apparatus according to Claim 54, wherein the means for deciding comprises:
means for determining a difference between an offer price included in the offer and the retail price; and
means for accepting the offer if the difference is less than a threshold amount.

56. (Currently Amended) An apparatus comprising:
means for preparing for a customer to redeem a product from a third party;
means for obtaining information relating to a redemption₁ of the product and by the customer, that has occurred; and
means for creating an offer based on the obtained information.
57. (Original) An apparatus according to Claim 56, further comprising means for transmitting the offer to a second customer.
58. (Currently Amended) An apparatus comprising:
means for preparing for a customer to redeem a product from a third party;
means for obtaining information relating to a redemption₁ of the product and by the customer, that has occurred; and
means for identifying, based on the obtained information, an assigned third party at which an agreement product may be redeemed.
59. (Original) An apparatus according to Claim 58, wherein the means for identifying comprises means for comparing a present market share associated with the third party to a target market share associated with the third party.

60. (Currently Amended) An apparatus comprising:
- means for obtaining a redemption identifier from a customer;
 - means for ~~furnishing~~ providing a product to the customer according to an agreement associated with the redemption identifier;
 - means for delivering information relating to the providing step to an entity, the information indicating that the product has been provided to the customer; and
 - means for obtaining authorization from the entity to provide a product according to a second agreement, the authorization based on the delivered information.
61. (Currently Amended) An apparatus for redeeming a product, comprising:
- means for obtaining a redemption identifier;
 - means for transmitting the redemption identifier to a product retailer;
 - means for obtaining a product from the product retailer based on the redemption identifier; and
 - means for delivering redemption information to a third party for use in determining to accept a received offer, the redemption information relating to the obtainment of the product that has occurred.

62. (Currently Amended) An apparatus for use in a sales transaction, comprising:

means for preparing for a customer to redeem a product from a retailer;

means for obtaining information relating to a redemption, of the product and by the customer, that has occurred;

means for obtaining an offer to purchase an offer product from a second customer;

means for deciding to accept the offer based on the obtained information;

means for identifying an assigned retailer at which the offer product may be redeemed based on the obtained information; and

means for presenting an acceptance of the offer and an indication of the assigned retailer to the second customer.

63. (Original) An apparatus according to Claim 62, wherein the means for identifying an assigned retailer comprises means for comparing a present market share associated with a conforming retailer to a target market share associated with the conforming retailer.

64. (Currently Amended) A device comprising:

a memory storing processor-executable process steps; and

a processor,

wherein the processor is operative with the processor-executable process steps to: i) arrange for a customer to redeem a product from a third party; ii) receive information relating to a redemption, of the product and by the customer, that has occurred; and iii) determine to accept an offer based on the received information.

65. (Original) A device according to Claim 64, wherein the offer is received from a second customer.

66. (Original) A device according to Claim 64, wherein the processor is further operative with the processor-executable process steps to determine, based on the received information, a third party at which an offer product may be redeemed according to the accepted offer.

67. (Original) A device according to Claim 64, wherein the information comprises a retail price of the product during the redemption.

68. (Original) A device according to Claim 67, wherein the processor is operative with the processor-executable process steps to determine to accept an offer by:

calculating a difference between an offer price included in the offer and the retail price; and

accepting the offer if the difference is less than a threshold amount.

69. (Currently Amended) A device comprising:

a memory storing processor-executable process steps; and

a processor,

wherein the processor is operative with the processor-executable process steps to: i) arrange for a customer to redeem a product from a third party; ii) receive information relating to a redemption, of the product and by the customer, that has occurred; and iii) determine an offer based on the received information.

70. (Original) A device according to Claim 69, wherein the processor is further operative with the processor-executable process steps to present the offer to a second customer.

71. (Currently Amended) A device comprising:
a memory storing processor-executable process steps; and
a processor,
wherein the processor is operative with the processor-executable process steps to: i) receive information relating to a redemption, of the product and by the customer, that has occurred; and ii) determine, based on the received information, an assigned third party at which an agreement product may be redeemed.

72. (Original) A device according to Claim 71, wherein the processor is further operative with the processor-executable process steps to compare a present market share associated with the third party to a target market share associated with the third party.

73. (Currently Amended) A device for a sales transaction, comprising:
a memory storing processor-executable process steps; and
a processor,
wherein the processor is operative with the processor-executable process steps to: i) receive a redemption identifier from a customer; ii) provide a product to the customer according to an agreement associated with the redemption identifier, iii) transmit information relating to the providing step to an entity, the information indicating that the product has been provided to the customer; and iv) receive authorization from the entity to provide a product according to a second agreement, the authorization based on the transmitted information.

74. (Currently Amended) A device for redeeming a product, comprising:
a memory storing processor-executable process steps; and
a processor,
wherein the processor is operative with the processor-executable process steps to: i) receive a redemption identifier, ii) present the redemption identifier to a product retailer, iii) redeem a product from the product retailer based on the redemption identifier, and iv) transmit redemption information to a third party for use in determining to accept a received offer, the redemption information relating to the redemption of the product that has occurred.
75. (Currently Amended) A device for a sales transaction, comprising:
a memory storing processor-executable process steps; and
a processor,
wherein the processor is operative with the processor-executable process steps to: i) arrange for a customer to redeem a product from a retailer;₂ ii) receive information relating to a redemption₂ of the product and by the customer, that has occurred; iii) receive an offer to purchase an offer product from a second customer;₂ iv) determine to accept the offer based on the received information;₂ v) determine an assigned retailer at which the offer product may be redeemed based on the received information;₂ and vi) transmit an acceptance of the offer and an indication of the assigned retailer to the second customer.
76. (Original) A device according to Claim 75, wherein the processor is further operative with the processor-executable process steps to compare a present market share associated with a conforming retailer to a target market share associated with the conforming retailer.
